XM Radio is the best part of my new car. I love it and the variety that it offers, no matter where I am traveling. I pay for this service and I do not think that the NAB should dictate what I can listen to. I respectfully urge the FCC to REJECT THE NAB'S petition 04-160. And I ask you to SUPPORT XM Radio's ability to provide instant weather and traffic information. This is an important safety consideration - I can always find XM weather and traffic but if I am traveling in a new area, I don't know where the local stations are that are broadcasting this information, if at all.  
Please don't mess up something as wonderful as XM Radio.
